214-449-8835

Education

Texas A&M University | 2018 – 2022
Bachelor of Science in Political Science
Cumulative GPA: 3.22
University Honors Fellow

Work Experience

Underwriting Service Assistant | State Farm | 2023-2024

- Processed policy transactions including household changes, discount applications, and policy additions using legacy mainframe terminal system with proprietary command interface
- Reviewed and verified insurance records by cross-referencing claims data and policy information, escalating complex cases to underwriters when required

2021 Undergraduate Research Assistant | Texas A&M University | 2021 – 2022
"CAREER: Estimating and Addressing Disaster Survivors' Unmet Needs: A Social Vulnerability and Social Infrastructure Approach." National Science Foundation. Michelle Meyer, PI.

- Co-authored the paper; managed a longitudinal dataset with disaster loss and nonprofit data the team collected to convert Excel spreadsheets into usable data and create new variables for calculations
- Identified patterns in the data and visualized trends with graphs & tables that were used in a conference presentation
- Completed undergraduate honors thesis on similar work analyzing climate/disaster data using regression analysis

Projects

KarmaFinder | Full-Stack Reddit Client | GitHub

- Deployed and maintained production web application on Ubuntu VPS, configuring Nginx reverse proxy, SSL certificates, firewall rules, and SSH security hardening
- Designed CRUD bookmark functionality using Node.js, Express, and PostgreSQL database allowing users to import and distribute curated content collections via Reddit OAuth
- Implemented full media handling supporting Reddit image galleries, videos, and misc content sources
- Created semantic search feature using vector embeddings with progressive loading algorithm to handle API rate limits combined with Redis caching layer to reduce API calls
- Created media delivery system that merges Reddit's split audio/video files using ffmpeg

Texterity | Text Display Overlay for Live Streaming | GitHub

- Developed live text overlay application for OBS/streaming software with customizable fonts, animations, and per-character effects & programmatic control
- Built custom software-based 3D renderer implementing backface culling, Z-sorting, and Phong lighting for user-programmable 3D graphics
- Implemented Electron-based IPC system to synchronize state between control panel and transparent overlay windows in real-time

Skills

Linux/Unix Systems: Ubuntu CLI

Database Management: PostgreSQL, pgAdmin, Redis

Full Stack Development: JavaScript, Python, Node.js

System Administration: VPS deployment & security

API Integration: REST APIs, OAuth

Version Control: Git/GitHub
